

## Microsoft Consultants Trained for You

Easily hire resources, save on recruiting fees and salary expenses, and know you're making the right hire by staffing Power Learn apprentices on your next project.

### Core Competencies

#### + Power Platform Makers

Our functional consultants develop technical fluency – using Microsoft's Power Platform to assist clients in getting the most out of their data, allowing them to visualize their business in a whole new way. They collaborate with clients to effectively use Power Apps, Power BI, and Power Automate.

#### + ERP Functional Consultants

Our functional consultants quickly learn the skills needed to make them competitive in Microsoft ERP consulting and implementations. They also learn how to bring a client's ERP-related ideas to fruition through resource-planning decisions.

#### + Azure Functional Consultants

Our functional consultants develop skills using Microsoft Azure to assist clients in building, automating, and implementing cloud infrastructures. They can also manage and administer SharePoint instances, tenants, and environments.

Power Learn is a unique Microsoft business technology apprenticeship where the industry's best consultants mentor the few who pass stringent requirements to join the academy. After an intense 12-week program, graduates are Microsoft Certified, given extensive project experience, and provide a low-cost, high-quality addition to project teams.

Project Today**

## How to Engage Power Learn Resources

Our graduates are great new additions to the Microsoft community and placing them on the right project at the right time can help organizations meet deadlines and save money. With this in mind, our senior architects help identify when Power Learn resources can take on certain tasks, lowering the cost to implement and go-live.

**“ We were surprised at how quickly our Power Learn Functional Consultant could start jumping into projects and helping us out. Some of these tools are brand new and many of our team members don’t have exposure to them. We’re glad we can rely on her to knowledge share with us.”**

– **Jason Jones**  
COO, WithoutWire

### + Complete Special Projects

Finally complete that special project your organization keeps talking about but can’t seem to find the time to complete. Our competent and low-cost resources make it easier than ever to get your projects moving.

### + Fortify Your Project Team

Meet and exceed project deadlines by adding a trained team member that’s ready to hit the ground running. Whether you bring in a Power Learn graduate at the beginning, middle, or end of the project, they’re ready to help take it to the finish line.
