Power Learn
Service Models

›› Contract Model

Created to supply resources on a project-by-project basis, Power Learn apprentices augment your project team at an affordable hourly rate.

›› Staffing Model

Designed to provide individual full-time resources fast, Power Learn apprentices are interviewed and hired as official employees of your organization.

›› Franchise Model

Constructed to standardize industry training, organizations are provided Power Learn content and instructor training to conduct their own Power Learn Academy.

›› Pipeline Model

Built to sustain resourcing needs, organizations sponsor Power Learn cohorts to hire all apprentices as full-time employees once they've completed the program.

It's no secret that good talent in the technology industry is difficult to find at an affordable rate. Recruiting firms require a hefty fee and additional company resources are needed to ensure quality training after the talent is hired. It's time we do away with the roadblocks that prevent organizations from finding and keeping top talent. Power Learn Academy provides certified resources with your organization's budget, timeline, and needs in mind.

" [My resource] is very detail oriented and very good at testing and training. A lot of developers can be lacking in personality, but [my resource] has that and he's able to converse with the client easily. That means a lot. You can have someone that knows everything technical, but if they don't get along with the client, then they're not going to stick around anyway. "

- Mark Blevins, Aviate Technologies

Power Learn FAQs

What are Power Learn graduates knowledgeable in?

Power Learn graduates complete the program with hands-on experience in consulting, computer science, and project management. Additionally, they are knowledgeable in development, Microsoft technologies, Dynamics 365, Portal and Power Apps, Power BI and SSRS/SSIS, Business Central and Finance and Supply Chain Management, SQL, as well as interviewing and personal branding.

How soon can they start?

Resources can start immediately after graduating from Power Learn. You can select and hire them during their training, but their actual start date will follow the program. Since all resources are billed T&M, you can lock them in, but not spend a dollar until they are on your project.

How many graduates can I hire at one time?

The amount of resources you can hire depends on the service model you select. With the Contract and Staffing models, you may hire as many individuals as Power Learn has available. Through the Pipeline and Franchise models, you can determine how many resources you'd like to hire and when.

Can Power Learn apprentices actually do the work?

Yes. Post-graduation, Power Learn apprentices are assigned a Senior Solution Architect as a mentor and immediately begin working in a team environment and producing on client projects. Working on these projects with a mentor helps them continue to gain valuable experience and additional skills quickly, rounding out their capabilities and adding to their Microsoft Certifications as they progress. We like to say that our Power Learn apprentices are plugged into the "big DCG brain" by benefiting from the expertise of Dynamic Consultants Group.
